TO MY WHOLESALE CUSTOMERS

Due to limited available quantities at this time, if you desire bulbs by the 100 or 1000 it will be best if you write me stating your needs.

PRUITT'S SEEDLING
Number 59

A long step toward the
standard of perfection.

TERMS

In many of the above varieties we have not enough stock to offer them in wholesale lots. We have most of them in hundred lots which may be purchased at 8 times the per 10 price quoted in this list.

It is an old story to hurry the buyer for fear stocks will be depleted. I am not going to say it in the usual old way, but it happens to be the condition of affairs with us this year. I have one little boast I can make, and that is I have one of the largest stocks of PICARDY in the country. At date of writing, Jan. 15, 1935, I still have a quantity of all sizes and bulblets. I do not expect them to last long however, as I have had recent inquiries for large quantities.

If large quantities are desired in any variety, please write me as to your needs. Prices quoted herein are prepaid to you, anywhere in the U. S. In case we are out of the size you order, we will supply equal value in the size above or below unless you specify not to do so at time of ordering. On orders amounting to \$5.00 or more, you may deduct 10 percent from the amount or select 15 percent in additional bulbs. In addition to this, we always give long count and something extra for you to try. All quotations subject to prior sale.

Our bulbs we think, are above average this year on account of the warm wet fall, giving them the best that nature has. All bulbs are treated three times with Cynogas, under the supervision of our State inspector, and we have every reason to believe there is no chance for thrips after such treatment.
